

Devon *Dart*

The Devon *Dart* – quality with a pure new look

The Devon Dart is our new model for 1984. It's based on the Devon Moonraker, Britain's best ever selling motor caravan.

The Dart combines the very best in tradition with ultra-modern design.

When we came to the interior we had the help of a top interior designer. Light and dark grey furniture, matching carpets and interior lining, and black curtains with a bold flower pattern were the highly attractive results.

The upholstery is 100% pure wool Dartington Tweed specially made to our requirements.

The Dart sleeps four, has comfortable, adaptable seats, a compact kitchen and bags of storage space. The kitchen is equipped with a spacious fridge and a cooker with two burners and a grill.

Devon's new Aerospace Elevating Roof

Every Dart is fitted with our unique and wonderfully roomy new Aerospace Elevating Roof. It rises easily on four gas struts. And unlike many motorcaravans the roof can be opened and shut without getting out of the vehicle.

Full trim and weatherproofing means you're protected from the weather at all times. For a minimal extra cost you can have an insulated roof to give you even more protection. And to protect your wallet the roof's aerodynamic design helps conserve fuel when closed.

To complete the new look we put a flash on either side of the roof. It doesn't make the Dart go any faster, but it gives it a distinctive appearance.
