Devon

# Latest Additions

Devon Conversions, one of Britain's best known names in the motor caravan field have launched an all-new family of vehicles that reflect what today's motor caravan owners want.

More than twelve month's careful research and development have led to these exciting new vehicles based on Volkswagen, Toyota and Bedford models, with more in the pipeline.

Modern styling combined with many practical new features and careful planning of the interior layout, backed up by Devon's 30 years experience make these new vehicles a very attractive proposition.

So why not take a closer look at Devon.

Devon EUROVETTE

Flagship of the new range, based on the well established Volkswagen Transporter, a name synonymous with Devon after many years successful association.

The all new Eurovette features Devon's own stylish and aerodynamic Hi-Top roof design which gives excellent interior space.

As befits a luxury model, the Eurovette sleeps two with ease, and offers impressive interior appointments; cooker, oven, large 3-way fridge, hot box central heating, warm water, 25 litre gas tank and 2 x 12 litre water tanks with electric pump.

Devon CARAVETTE

An ingeniously designed elevating roof with fully insulated rigid panels distinguishes the Caravette.

Based on the popular VW Transporter...

tanks with electric pump.

Also standard are the generously sized double bed, secure storage for cutlery and crockery, and spacious cupboards.

Options include a water heater, microwave oven, Porta Potti and an ingenious "beach shower" unit with hot water for use outside of the rear of the vehicle.

Based on the popular VW Transporter, renowned for its superior performance and a high degree of comfort, the Caravette, is designed for family use all year round and incorporates an extremely practical interior that can have a double or two single beds in the roof in addition to the main double bed.

Standard fittings include foldaway gas cooker, two-way fridge and stainless steel pull-out sink unit with drainer and cutlery drawer. There is also a wardrobe, plenty of storage space and removable water tank with electric pump. Seating is provided for up to seven, with all seats forward facing or alternatively the first pair can easily be switched to face rearwards.

Options include sunroof and Hi-Top fixed roof in place of elevating roof.

## Devon DOVE AND DOMINO

The Dove, a four berth conversion, has the "Double Top" elevating roof, which gives spacious living accommodation, and has seating for up to six people whilst travelling.

Comprehensive equipment includes cooker, fridge, stainless steel sink with drainer, electric water system, wardrobe and plenty of well planned storage space.

Launched to an enthusiastic response from trade and public this Autumn, the Domino, based on the Bedford Midi Van, was the first vehicle to feature the new 'aero-look' Hi-Top roof that integrates so well with today's more streamlined vans.

Fully insulated, with side windows and roof vent, this spacious new roof incorporates an over cab locker for table storage, with racking along the rear and nearside for crockery, maps and magazines.

Interior fittings and equipment (which includes an oven and a large 3 way fridge) are to Devon's usual high standards. There is a choice of either two single beds or one double bed, each of increased width for added comfort.

Neat and practical, as are all Devon motor caravans, the Domino and Dove are well worth closer inspection.

## Devon TOURACE AND TOPACE

Available for the first time with both High-Top and elevating roof are the two new Toyota Hi-Ace based models, both with 2 litre petrol engine.

The TourAce elevating roof model, which sleeps four, benefits from a larger bed, and is equipped to a similar high standard as the TopAce. Seating is available for six people.

The TopAce, featuring a fully insulated fixed Hi-Top roof with side windows is designed primarily for two but can accommodate four in style and comfort.

All seats and beds are of increased width, and all the usual Devon refinements such as cooker, oven, fridge, stainless steel sink with drainer, powered water supply and carefully planned storage space make this an attractive vehicle to own.

Both these conversions are finished to the high standards for which Devon are recognised, with generously cut upholstery and curtains in quality material.

Full manufacturers approval for both these models is your assurance of quality.

Devon **SUNRISE**

Identical in concept to the Moonraker, and using the same base vehicles, the Sunrise offers a higher level of interior appointments and fittings to make it even more luxurious. The main changes are in the kitchen area; a smart matching vitreous enamel sink unit and gas hob replace the stainless steel versions, and the fridge is a large 2 cu. ft model with 3-way power. Kitchen units that would grace any home are complemented by hardwearing laminate worktops, and the level of interior trim is superb; best quality dralon upholstery, generously cut curtains in thick material and touch catches on all cabinet doors. Devon's first class craftsmanship allied to the all round virtues of the VW's make this an ideal 'home on wheels'.

Devon **MOONRAKER**

Britain's most popular caravan for many years, based on the Volkswagen Kombi and Transporter the Moonraker has established a reputation for style, flexibility and ease of use. A well equipped kitchen features stainless steel sink with draining board, electric water pump, gas cooker, cavernous storage locker, large cupboard and gas/electric fridge. Accommodation is for four adults on two large double beds, or one double and two singles for family usage. The unique AeroSpace roof offers a surprising amount of interior space. There is also a roof vent with fly screen as standard.

Devon **DAWN**

Based on the Transit 100 model with Ford's luxury custom pack, the Devon Dawn set new standards for motor caravan design when it was launched 18 months ago. Approved by Ford, the Dawn is fitted with an aerodynamically shaped Hi-Top roof, complete with tinted side windows and roof vent. Accommodation is for two adults, with optional single beds for children 'upstairs'. Interior trim is of a bright, modern striped design in either red and white or blue and white. All the seat covers and curtains are machine washable, making it practical as well as pleasing to the eye. Fittings and equipment conform to Devon's usual high standards, and options include a mains electricity package, larger 3-way fridge and space heater.

# Family Favourites

Devon have never believed in 'change for the sake of change.' The solid, respectable virtues of the Sunrise, Moonraker and Dawn models, all firm favourites with caravan owners, mean that developments for '86 have been limited to small but important improvements.

With full manufacturers approval as your quality assurance, these three, and indeed all Devon models, offer excellent value for money.
